Subject: Immediate Need for Basic Health & Hygiene
Facilities for Female Students

Respected Sir,

We are submitting this deputation to bring your urgent attention to some serious concerns regarding the health and hygiene infrastructure available for female students in our institution. Despite repeated informal complaints and growing concerns from students, basic issues remain unaddressed. The lack of Sanitary Napkin Vending Machines near Ladies Washrooms across all the floors poses a significant challenge, especially during emergencies. We demand immediate installation of 26 sanitary napkin vending machines outside every Ladies Washrooms to ensure dignity and health support for students.

Additionally, the current condition of many ladies washrooms is extremely poor. In some cases, washrooms are without doors, compromising basic privacy and security. Such situations are unacceptable in any academic institutions and must be addressed without delay through necessary repairs and maintenance to ensure cleanliness and dignity for all Students. Another pressing issue is the lack of accessible clean drinking water. Several floors do not have functioning water purifiers, forcing students to rely on unsafe or inconvenient sources. We urge the administration to install water purifiers on every floor so that safe drinking water is available to all.

30/5/25

These concerns are not isolated or subjective - they reflect the collective voice of over 100 female students across every department who have signed in support of this deputation. As representatives of the student body, we urge you to take quick, swift & effective action to resolve these issues at the earliest.

We look forward for your positive response and are open to further dialogue if required.
